Communications on the Move (C-OTM) from Exelis

12-Jan-2015

Stove piped communication technologies can make it difficult for government agencies to communicate with each other in the field. The Exelis Communications On The Move (C-OTM) bridges this gap, allowing deployed personnel to use their existing communications equipment to interoperate with other agencies in an incredibly small, ruggedized package.

MOBILE COMMAND CENTER

C-OTM provides a standalone command post for multi-agency operations. The powerful touch screen based operator position allows real time command and control via entire existing communications infrastructure. It provides access to multiple local and remote radio channels (digital and conventional) allowing the centrally located command centre to monitor onsite communications via the Satellite or IP WAN.

RAPID DEPLOYMENT

Lightweight and transportable, C-OTM is easily deployed in the field to integrate disparate technologies including IP and analog phones, radios and cellular equipment. The system allows these different communications sources to be automatically routed, patched and conferenced to provide a truly interoperable communications solution.

To achieve all this, the C-OTM provides the user with a huge array of built in communications connectivity including: Ethernet (IEEE 802.3 10/100 Base-T), Wi-Fi (802.11 b/g/n hotspot or client), 2-way Radios (P25, Tetra, conventional, CNR), GSM (LTE 2/3/4G), telephone (SIP and analogue), GPS and AC and DC power. All in a package that fits into the overhead bin on most aircraft.

About Exelis

Exelis is a diversified, top-tier global aerospace, defense, information and services company that leverages a 50-year legacy of deep customer knowledge and technical expertise to deliver affordable, mission-critical solutions for global customers. We are a leader in positioning and navigation, sensors, air traffic management solutions, image processing and distribution, communications and information systems; and focused on strategic growth in the areas of critical networks, ISR and analytics, electronic warfare and composite aerostructures. Headquartered in McLean, Va., Exelis employs over 17,000 people and generated 2013 sales of \$4.8 billion. For more information, visit our website at www.exelisinc.com/c4i or connect with us on Facebook, Twitter and YouTube.
