US Presidential Inauguration powered by C-OTM

13-Feb-2017

All In A Day's Work

For the USA's 45th Presidential Inauguration Day, Harris was called upon to rapidly deploy Harris' class-leading 'Communications - on The Move' (C-OTM) solution. With only one days' notice, the C-OTM and radio equipment were mobilized into a Mobile Command Center, with training provided to support the inaugural ceremonies the very next day.

The C-OTM enabled personnel to monitor multiple radio channels and rapidly cross-band/bridge communications to interoperate with other multi-vendor networks on-demand. C-OTM's powerful touch-screen-based interface equipped the operators with real-time command and control of the entire communications infrastructure.

The Harris team's rapid response along with the C-OTM's ease of set-up and use earned high praise from the customer.
